

BRADFORD WHITE

HIGH OUTPUT MI-60 WATER HEATER

Meet our new, 60-gallon water heater that redefines the words "High-Output." This Natural and LP gas model is atmospherically vented and features Bradford White's renowned Defender Safety System®. You'll get amazing output and installation convenience that makes it perfect for retrofit applications.

- A 40,000 BTU/Hr input with a 90-gallon First Hour Delivery
- High volume conventional vent product provides more hot water
- Available in standard and high-efficiency models
- Three-inch flue makes for the perfect retrofit opportunity
- Smaller vent than comparable products require
- Defender Safety System® - our acclaimed FVIR technology
- Resettable Thermal Switch - prevents operation in case of ongoing flammable vapor burn
- ScreenLok® Technology Flame Arrestor - proven flame arrestor design
- Hydrojet® Total Performance System -
 - ✓ Reduces sediment build-up
 - ✓ Increases the first hour delivery
 - ✓ Minimizes thermal stratification
- Vitraglas® - the world's best tank lining
- Heat Traps - new design is quiet and reduces heat loss
- Piezo igniter - push button lighting of pilot
